

WHAT IS THE WALL STREET TRANSACTION TAX?

- ...► A tiny tax on Wall Street trading of 0.5% on transactions like stocks, bonds, foreign currency bets and derivatives could raise \$350 billion a year in the US. It's well-tested, cheap to implement, and hard to avoid.
- ...► In recent years, transaction taxes have been introduced very effectively in more than 40 countries around the world.
- ...► These taxes reduce financial speculation and automated trading.
- ...► They are an incentive for productive investment.
- ...► **What is taxed:**
 - Transactions on stocks, securities, purchase of debt, options, credit swaps, foreign currency "bets," and derivatives.
- ...► **What is NOT taxed:**
 - ATM withdrawals
 - Home mortgages issued to buyer
 - Loans received
 - Initial issuance of a stock or bond
 - Short-term revolving loans
 - Individuals who have 401(k) or mutual fund accounts
- ...► **Who Pays:**
 - The stock exchange, the broker, or If neither is involved, then the institutional investor or day trader.
